I'm a passionate coder with a love for creating innovative and engaging projects, especially in web development. My coding journey began at university, where I found joy in bringing ideas to life through programming. I enjoy designing and developing websites that are both functional and visually appealing, blending technology with creativity.

I work well with others and thrive in team settings. I believe the best solutions come from teamwork, and I like sharing ideas. I am always full of creative ideas and eager to share them. As a bit of a perfectionist, I pay close attention to detail and strive for excellence in everything I do. I'm committed to continuous learning and always look for ways to improve my skills and deliver high-quality results.
